

SUSHI
INU

Sushipaper

Welcome to Sushi Inu 🐕

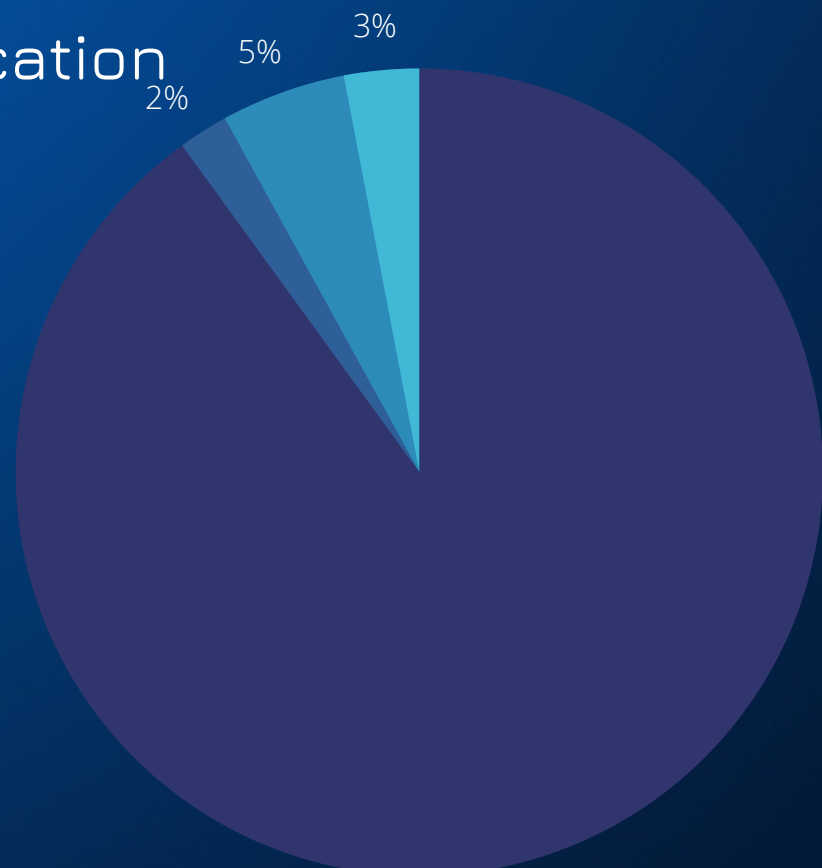

SUSHI - INU wants to be a group managed by the whole community. In a world fighting for economic decentralization, Sushi Inu makes its contribution by preferring small investors to large speculators. The deflationary nature of the token and the possibility of being able to use it in the Sushi ecosystem allow investors to increase their earnings simply by holding.

Allocation

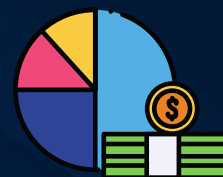

SUSHI - INU Initial Allocation

- 90% Liquidity
- 5% Airdrop
- 2% Marketing
- 3% Team

90%

Tokenomics

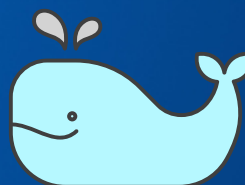

SUSHI INU is a fast burning, deflationary token on the BSC. With a super high burn rate, the supply burn at every transaction.

The maximum of tokens that will be created is 1,000,000,000,000,000,000 SUSHI. The fees will be 10% of the transaction and will be divided as follows (wallet sushi to sushi 0% transaction fee)

WhaleBlock

Our anti-whale system provides that no one can buy more than 2% of the total supply, and no transaction that is greater than 2% of the wallet can be confirmed.

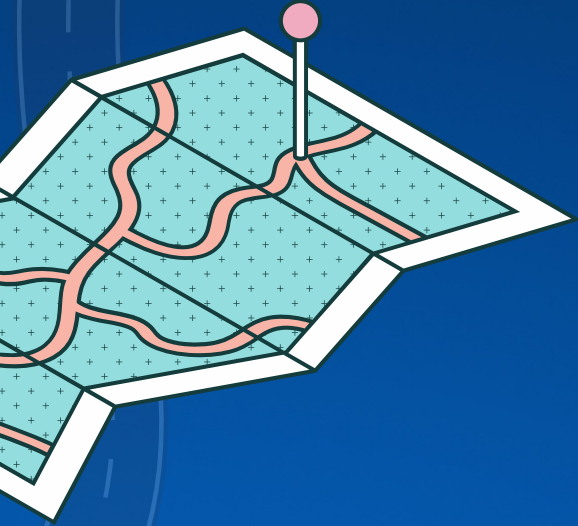

Wallet

Metamask and Trustwallet are confirmed as the best wallets to hold our sushi.

Road Map

1. Development (Website, Contract)
2. Big Marketing Campaigns
3. Launch
4. EXCLUSIVE Dextools ad campaign starts on 1th May
5. Social media boost
6. Giveaways,Airdrops
