

Shiba Inu Billionaire

WHITEPAPER

Shiba Inu Billionaire

His whole life he dreamed of becoming famous and rich. One day he decided to invest into Crypto Meme Tokens. This turned out to be the best decision of his life. Now he has been admitted into the Billionaires Club where he enjoys his life in the high society. Buy \$SHIBIB now to become a member of the Billionaires Club too.

Project goal is to reach a market cap of 2 billion USD!

Cryptocurrency

Because cryptocurrencies are managed in decentralized manner, they offer important properties, such as a high degree of security, speed and privacy.

In practice cryptocurrencies can be bought and traded from anywhere – an internet access is the only essential requirement. You can easily send money to other people via CFDs without having to worry about surprisingly high fees.

In conclusion, cryptocurrencies make payments over the internet safe and quick and can be used by the general public as a means of payment, which is not controlled by an authority.

Roadmap

Phase 1:

Development (Website, Contract)
Big Marketing Campaigns
Presale
Launch
EXCLUSIVE Dextools ad campaign starts on 15th November
Social media boost
Airdrops, Giveaways
Coingecko Listing
Coinmarketcap Listing
10.000 Holders

Phase 2:

Poocoin banner ads
Influencer poromotions (YouTube, Twitter, TikTok)
Community contests
First Manual Token Burn Event
Big Airdrop Event
Centralized Exchange Listing
25.000 Holders

Roadmap

Phase 3:

Christmas Tesla Giveaway
Second Manual Token Burn Event
Merchandising
Awesome PlayToEarn Blockchain Game
More Centralized Exchange Listings
50.000 Holders

Phase 4:

NFT Marketplace
Swap with cross-chain support (ETH, ADA, SOL)
Mobile App Billionaires Club With Wallet
Tier 1 Centralized Exchange Listing
100.000 Holders

Ecosystem

Shiba Inu Billionaire (\$SHIBIB) is a Decentralized Finance (DeFi) token on the Binance Smart Chain (BSC).

As opposed to projects that are heavily focused on farming and acquiring pools of liquidity, we seek to avoid chaotic price fluctuations as much as possible.

Tokenomics

Max Supply

1,000,000,000,000,000

Initial Circulating Supply

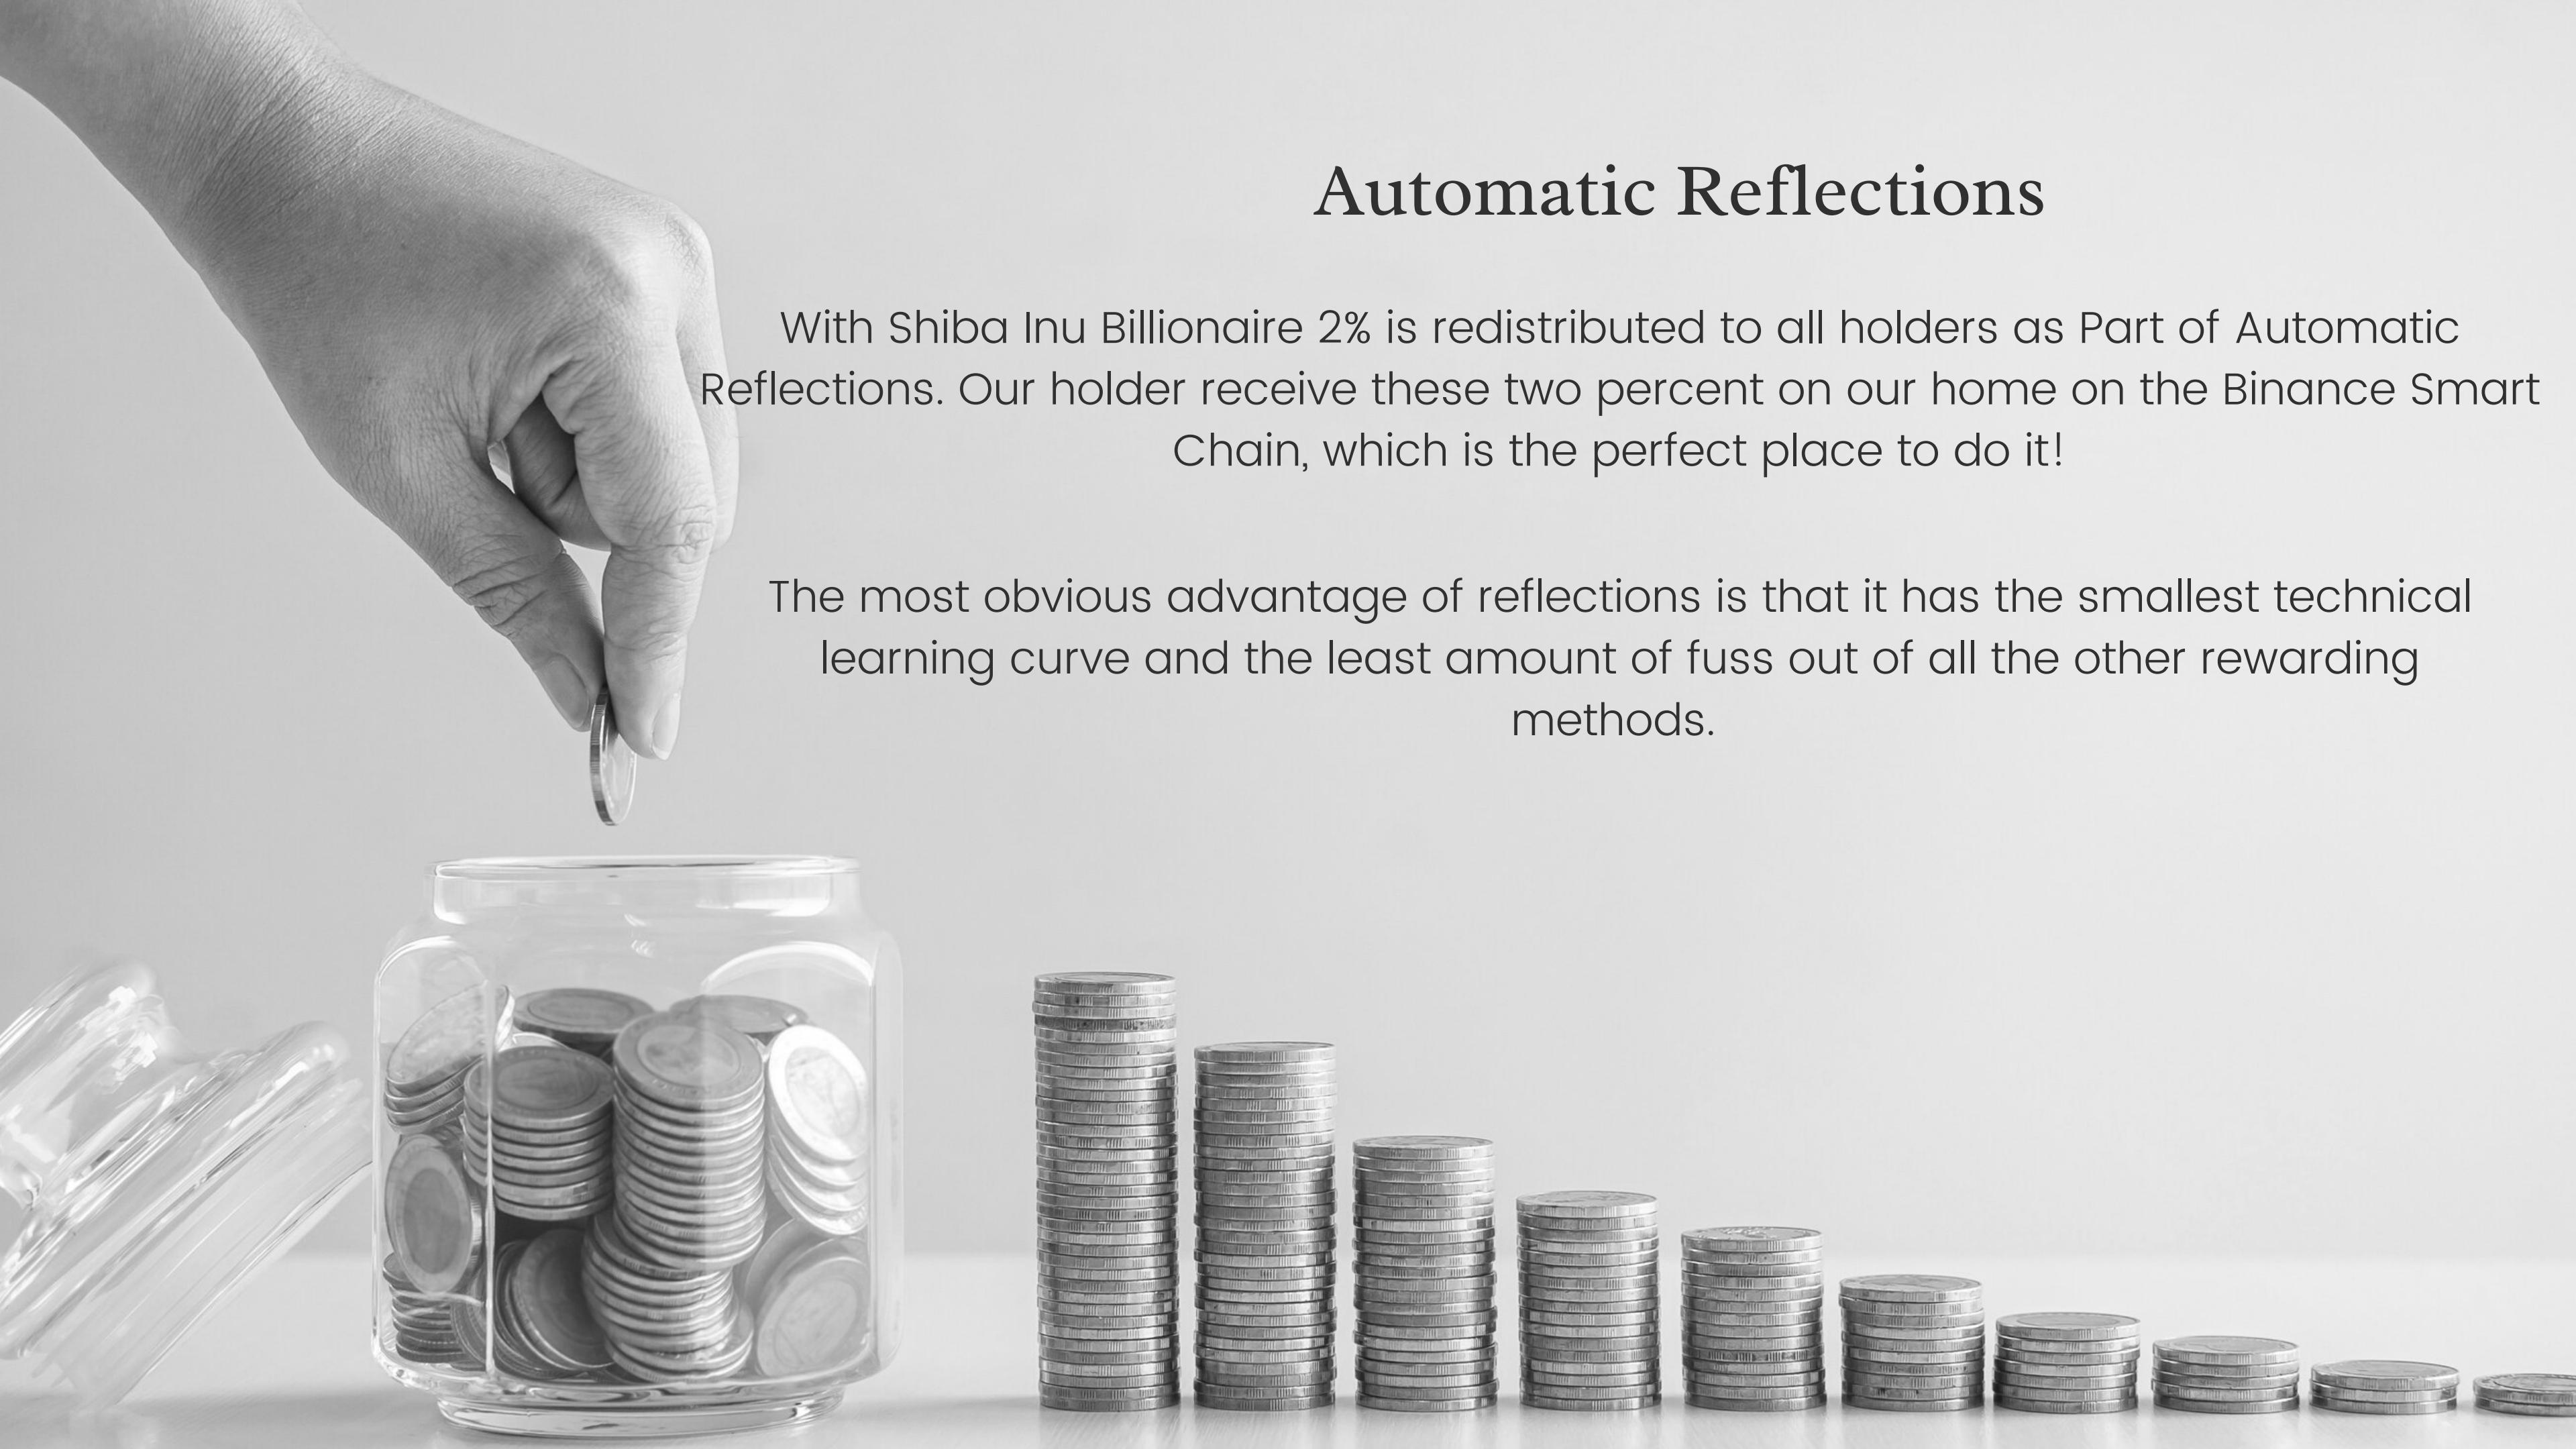

1,000,000,000,000

8% Automatic Liquidity

2% Redirected to Holders

Automatic Reflections

With Shiba Inu Billionaire 2% is redistributed to all holders as Part of Automatic Reflections. Our holder receive these two percent on our home on the Binance Smart Chain, which is the perfect place to do it!

The most obvious advantage of reflections is that it has the smallest technical learning curve and the least amount of fuss out of all the other rewarding methods.

Proof of Stake

ENVIROMETALLY-FRIENDLY

One of the main benefits of Proof of Stake (holding the TOKEN) is the contribution to the environment by reducing the high energy consumption of the hardware and using an energy efficient platform like Binance Smart Chain.

COST-EFFECTIVE

Proof of Stake (POS) blockchains are not only more cost-effective platforms for transactions compared to proof of work chains, but the inherent unstable financial risks of crypto mining do not exist with POS because they are more reliable and consistent.

HIGHLY SECURE

Binance Smart Chain is the largest crypto exchange by trading volume and it ensures security through effective security measures, a Secure Asset Fund for Users (SAFU), a secure wallet, and a double-checking system that allows you to autostake \$SHIBIB.

Automatic Liquidity

The automatic liquidity function has a dual benefit.

As the contract collects tokens from both buyers and sellers and sends them to the Liquidity Pool, it provides a stable price floor. And the second benefit of this transaction penalty is that it prevents arbitrage, promoting a healthier, safer and more vibrant volume for holders.

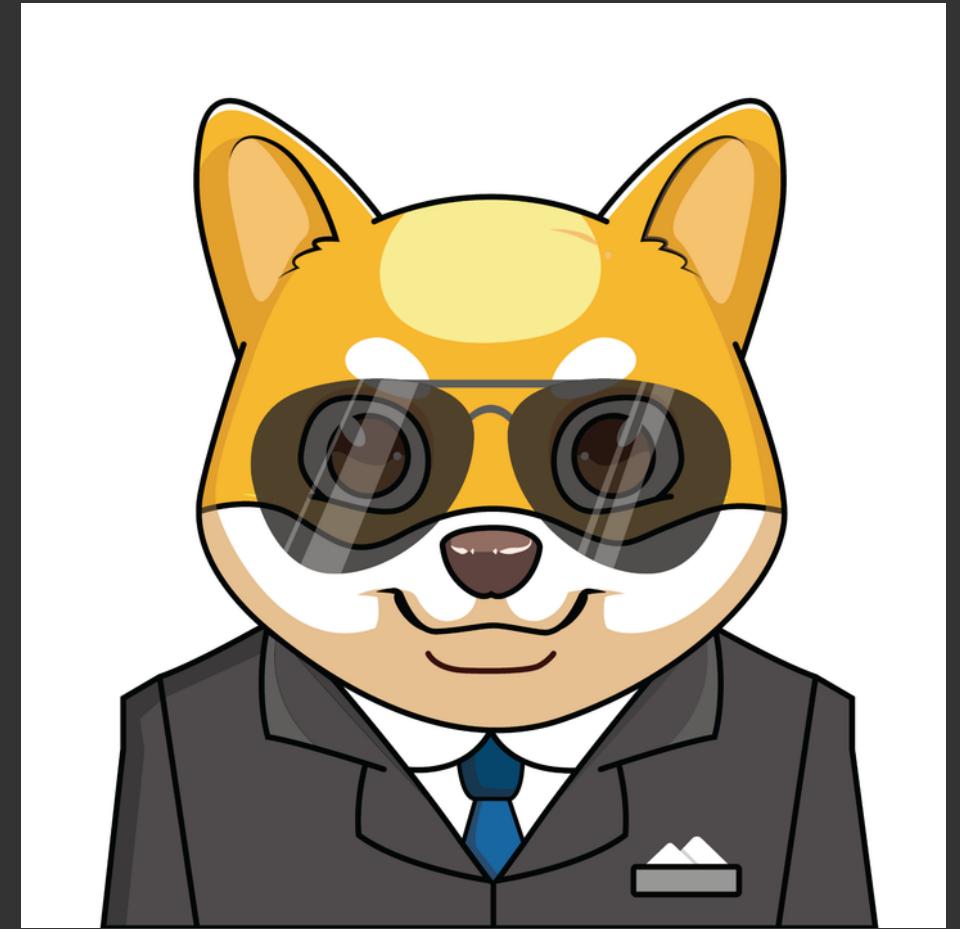

If we think of the liquidity pool as the foundation that keeps the system "afloat," we can make a model comparison to combustion functions that only get a short-term benefit from a reduction in supply. Why short term? If whales tend to sell large positions or take profits, a burn function will have little or no impact at that time because the ecosystem is supported by the liquidity pool. By putting 8% of these sales into the liquidity pool, a better cushion is built.

Billionaires Club NFT Gallery

Shiba Inu Billionaires Club NFT Platform

The Shiba Inu Billionaire NFT platform will be developed for our community and investors to trade and exchange our unique NFTs in a comfortable way on a user friendly interface.

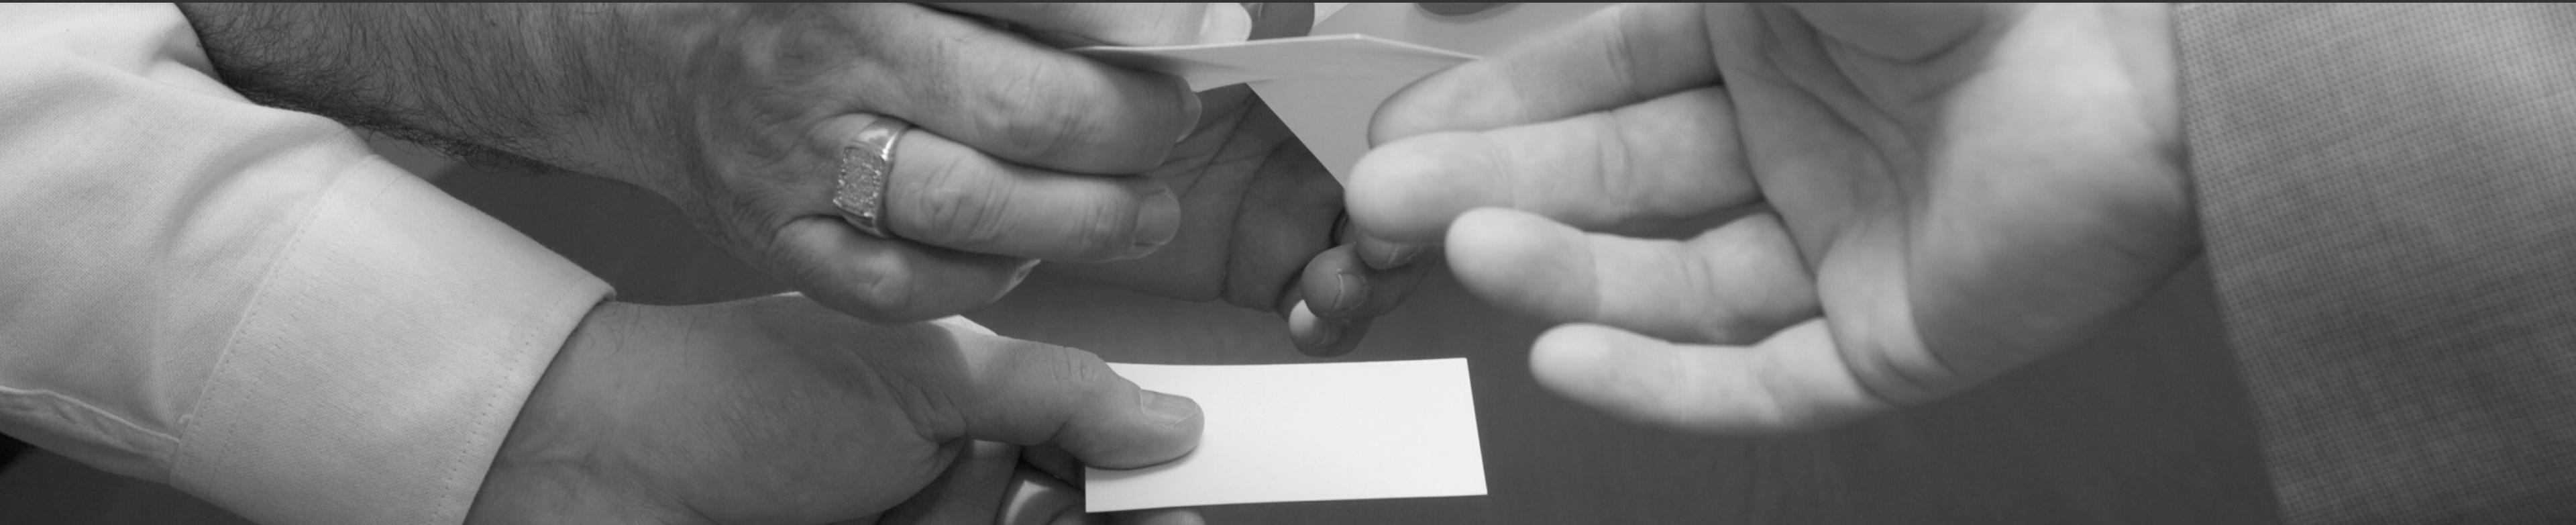

Shiba Inu Billionaire Swap

With Shiba Inu Billionaire Swap, you could exchange crypto in your private key Wallet or your trading account. Swapping from your Private Key Wallet offers the benefits of non-pledgeable on-chain trade settlement.

Conversely, swapping from your trading account offers faster settlement and no network fees.

One of the unique key features will be the blockchain interchangeability.

SHIBIB Token Play To Earn

A unique, Steam inspired Play to Earn Blockchain Game for desktop and mobile will be developed by our team.

Here you will be able to invest and earn SHIBIB Tokens by regularly playing the game.

Charity

We will donate from our charity wallet to various institutions which help people or animals in need. The community can vote on how much, when and where to donate!
